Abstractions

Overview

Insigne Abstractions is a break from working with letterforms and a chance to play with pure abstraction. These ornaments are purely nonrepresentational, and are not letterforms. The abstractions are organic, and some would describe them as magnifications of microorganisms in black and white. There are 72 different ornaments in this package. Some potential uses for these ornaments include alien alphabets, navigation buttons for a website, decorative elements, inspiration for logos or background textures.
