A Geometric Display Typeface

Taking into consideration some complaints about lack of capital letters and deficiency of heavier weight styles, **Fermo™** typeface was redesigned to replace the existing font, dated 2002.

New **Fermo** includes two subfamilies – **Fermo TRF** and **Fermo-Uni TRF**. Both fonts now consist of three weight styles – light, regular and bold – with significant contrast. During the updating process some minor glyph shapes' adjustments and changes have been made.

**Fermo TRF**'s main distinctions from the previous font are the new capital letters and additional weight (light) style. **Fermo-Uni TRF** is a unicast font with an additional lightweight style.

**Fermo** is recommended for use as a display font. In large size settings negative tracking is recommended.

See the giant brick which I examine near the wharf. **Sylvia dares quickly the joke at Pforzheim. Franz chases in the completely shabby cab straight through Bavaria. Victor chases twelve boxers across the great dam of Sylt. Wrong practising of xylophone music bothers every larger dwarf.**
