The Rock Pigeon is 32 to 37 cm long with a 64 to 72 cm wingspan. The white lower back of the pure Rock Pigeon is its best identification character, but the two black bars on its pale grey wings are also distinctive. The tail is margined with white.

It is strong and quick on the wing, dashing out from sea caves, flying low over the water, its lighter grey rump showing well from above. The head and neck of the mature bird are a darker blue-grey than the back and wings.
